# **LIGHTNING POLICY:**

Guests are cautioned to use common sense and not wait for a warning signal if they believe lightning is imminent or nearby. RiverPines Golf does not offer guaranteed protection against lightning and/or dangerous weather (i.e. sudden lightning strikes). Guests that are using RiverPines Golf property assume their own risk with respect to potential injury or death caused by lightning.

In an attempt to assist golfers, RiverPines Golf uses an automated lightning detection system that will notify golfers, in most cases, that dangerous weather is approaching. When the warning signal sounds, horn-siren, horn-siren, the course is closed. Players are required to return immediately to inside the clubhouse.
